

PROJECT REPORT

Of

ADJUSTABLE HOSPITAL BEDS

PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding **Adjustable Hospital Beds**.

The objective of the pre-feasibility report is primarily to facilitate potential entrepreneurs in project identification for investment and in order to serve his objective; the document covers various aspects of the project concept development, start-up, marketing, finance and management.

[We can modify the project capacity and project cost as per your requirement. We can also prepare project report on any subject as per your requirement.]

PROJECT PROFILE ON
ADJUSTABLE HOSPITAL BED

PRODUCT & ITS USES

Adjustable hospital beds are made of steel & normally used in Govt. Hospital, Private Hospital, & Nursing homes etc. There are two types of hospital beds namely:

- i) General purpose Hospital Bed Steeds
- ii) Fowlers Hospital Beds

MARKET POTENTIAL

The demands for adjustable beds are increasing day by day due to the following reasons:

- i) Increase the number of Hospitals in private sector& their expansion
- ii) Increase in number of private & Government nursing homes & their expansion.

The Govt. is encouraging new hospitals & nursing homes in private sectors in order to increase treatment facilities in accordance with the development in public health sector & as such it is likely to be a steady increase in the demand for hospital furniture. However, the growth rate is expected to be more than 5% to 8% per year and as such it may be ideal for the existing steel furniture manufacturer units to take up this activity for not only as diversification but also better capacity utilization by installing a few balancing equipments.

PRODUCTION TARGET

It is proposed to manufacturer 600 adjustable Beds per annum

BASIS & ASSUMPTIONS

- i) This project profile is based on 8 working hours a day and 25 days in a month and the break even efficiency has been calculated on 60% capacity utilization basis.
- ii) The gestation period in implementation of the project may be about 8 to 12 months. This period included making all arrangements, completion of all formalities, market surveys and tie ups, financial arrangements, purchase of machines, recruitment of staff, commissioning of plant and trial production etc.
- iii) The normal wages and salaries being paid in the industry to various grades of personnel have been considered and also the provision of minimum wages has been taken care of.
- iv) The rate of interest both for fixed and working capital have been taken as 11.50% P.A.
- v) The payback period for finance to the financial institutions may be about 5 years in case of term loan. The working capital loan may however be in a shape of rolling/limit based capital.

IMPLEMENTATION SCHEDULE:

Implementation of the project involve various activities like market surveys and tie-ups, procurement of know-how, arrangement of premises/ land, building, preparation of project report, registration, financing, purchase of machines, commissioning of project, recruitment of staff and training, arrangement of power, procurement of raw materials, packing materials, trial production etc. in order to implement the project efficiently and in the shortest period there is a need to initiate many activities simultaneously as far as possible. This will not only cut the slack period but also will give quick results and be cost effective. It is advised to follow PERT/CPM/NET WORK analysis technique for implementation along with their estimated time requirement is given below:

S.No.	Activity	Estimated period required
1.	Market survey	15-20 days
2.	Procurement of know-how/experts	30 days
3.	Arrangement of premises	30-45 days
4.	Obtaining quotations and preparation of project report.	15-20 days
5.	Registration and financing.	45-60 days
6.	Recruitment of personnel and training.	30-45 days
7.	Obtaining power connection.	15-30 days
8.	Procurement of machines and equipments.	45-60 days

9.	Installation and electrification of machinery.	20-30 days
10.	Procurement of raw materials, consumables, packing materials etc.	5-10 days
11.	Product development/trial production.	5-10 days
12.	Commercial production.	5 days.

PRODUCTION DETAILS & PROCESS OF MANUFACTURING:

The basic operations involved in the manufacturing of adjustable beds are as follows:

- i) Cutting & bending of pipes
- ii) Cutting of MS angles
- iii) Cutting of strips
- iv) Welding& Riveting
- v) Grinding
- vi) Assembly of elevating mechanis
- vii) Painting& baking_

INSPECTION & QUALITY CONTROL

IS: 7378-1974specifies dimensional & other requirements of fowlers beds used in hospitals. The above specifications may be followed for quality control.

ENERGY CONSERVATION

This industry is not a large power consuming industry; however maximum care should be taken in utilization of electrical energy.

POLLUTION CONTROL

These types of industries are not producing any effluents or any other polluting materials. Therefore pollution control measures are not taken into account.

PRODUCTION CAPACITY:

This unit is envisaged to produce 600 Nos. of different types of hospital beds to the worth of Rs.89.55 Lacs.
